

A CUSTOMER CHANNEL FOR MANUFACTURING PARTNERS

You focus on production. We plan the customer handoff.

Sign Commerce is developing an additional sales channel for sign manufacturers, starting with yard signs and vinyl banners. Our planned role covers customer requirements, quote coordination, artwork approval and support. We aim to use your existing reseller process, subject to confirming requirements together.

Illustrative concept. Not a completed Sign Commerce customer project.

Why work with Sign Commerce?

An additional sales channel. We aim to attract and serve business customers who need signage.

Less customer coordination. Our planned role covers requirements, artwork approval and customer support.

Clearer production requests. Organized specifications and approved artwork for your preflight review.

A practical start. We aim to use your reseller process, subject to confirming requirements together.

OUR PROPOSED ROLE

We would manage the brief, quote coordination, artwork approval and support, then submit agreed specifications.

YOUR PROPOSED ROLE

You would review files, confirm price and timing, manufacture accepted orders, and provide agreed shipping and tracking.

What a pilot would look like

- 1. Confirm fit.** Review yard-sign and banner capabilities, trade-account requirements and artwork standards.
- 2. Agree on terms.** Confirm pricing, payment, turnaround, blind-shipping labels, return address and claims or reprint policies.
- 3. Decide together.** Review the sample specifications and account requirements before deciding whether to run a pilot. Any sample purchase needs separate approval.

sign-commerce.com

Operated by Duck Commerce Labs LLC. Proposed pilot; no guaranteed volume or order commitment.

Product supply only. Engineering, installation, permitting and site surveys remain separate.

Live customer ordering and payments remain disabled.
